

Simplify and Secure Your Biosafety Quality Control

Compliant, Faster, Animal-Free.

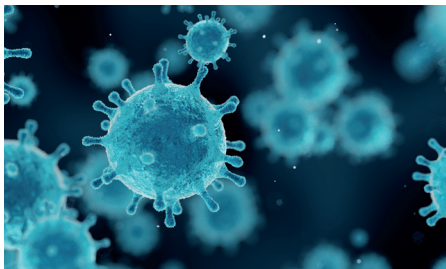

VIRAL SAFETY

**Simplified Adventitious Virus Testing:
Replace Traditional Testing
with One single NGS assay**

 **iDETECT®** Cell bank characterization, CHO bulk harvest, CAR-T and cell therapies lot

 **iDETECT®** Vaccines, oncolytic viruses, and viral vectors, on bulk harvest, drug substance, drug product and lot release

GENETIC CHARACTERIZATION

**Deep Molecular Insights
with Advanced Characterization**

 **iDETECT®** Identity confirmation & cell line characterization

 **iDETECT®** Characterization of integration sites for clone selection and genetic stability

Your global CRO partner For Biopharma QC Testing with NGS

Compliant, Faster, Animal-Free.

Next Generation Sequencing GMP assays

Rapid & safe with low volume requirements

100% animal-free testing

Endorsed by Regulators:

ICHQ5A(R2) & 5B, European Pharmacopoeia,
WHO Expert Committee on Biological
Standardization, FDA Biologics type 5 master file

Virology Expertise: data reviewed by virology
experts, ensuring support for data interpretation

Global Support: 2 GMP facilities in Paris (France)
and Wayne, PA (US)
