

# Simplify and Secure Your Biosafety Quality Control

**Compliant, Faster, Animal-Free.**

## VIRAL SAFETY

**Simplified Adventitious Virus Testing:  
Replace Traditional Testing  
with One single NGS assay**

 **iDTECT®** Cell bank  
characterization,  
CHO bulk harvest, CAR-  
T and cell therapies lot

 **iDTECT®** Vaccines, oncolytic viruses,  
and viral vectors, on bulk  
harvest, drug substance,  
drug product and lot  
release

## GENETIC CHARACTERIZATION

**Deep Molecular Insights  
with Advanced Characterization**

 **iDTECT®** Identity confirmation  
& cell line  
characterization

 **iDTECT®** Characterization of  
integration sites for  
clone selection and  
genetic stability

## Your global CRO partner For Biopharma QC Testing with NGS

**Compliant, Faster, Animal-Free.**

Next Generation Sequencing GMP assays

Rapid & safe with low volume requirements

100% animal-free testing

Endorsed by Regulators:

ICHQ5A(R2) & 5B, European Pharmacopoeia,  
WHO Expert Committee on Biological  
Standardization, FDA Biologics type 5 master file

Virology Expertise: data reviewed by virology  
experts, ensuring support for data interpretation

Global Support: 2 GMP facilities in Paris (France)  
and Wayne, PA (US)
